SUMMARY

Computer Science graduate (2026) who likes building things that work end to end. Spent the last year deep in **React**, **Node.js**, and **PostgreSQL** — from database schema to shipped UI. Built a job-tracking app now used by 40+ students in my program, and a small API wrapper published on PyPI. Comfortable with **REST APIs**, **Git** workflows, and picking up new tools quickly. Looking for an entry-level **Software Engineer** or **Full-Stack Developer** role.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, Flask, REST APIs

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, Docker, VS Code, Postman

Testing: Jest, Pytest

PROJECTS

Job Tracker / *Application Tracking Web App* / *React, Node.js, PostgreSQL*

 [GitHub](#)

- Built a full-stack **job application tracker** used by **40+ students** in my program.
- Designed a **PostgreSQL** schema with status history, tags, and follow-up reminders.
- Implemented **JWT authentication** and per-user data isolation on the backend.
- Built a responsive **React** dashboard with filtering, sorting, and inline editing.
- Deployed the app on **Render** with automatic deploys from the main branch.

Weather CLI / *Command-Line Weather Tool* / *Python, REST API*

 [GitHub](#)

- Built a **Python CLI** tool that fetches and formats weather data from a public REST API.
- Published the package to **PyPI**, reaching 150+ downloads in the first two months.
- Added local caching to cut redundant API calls by roughly **60%**.
- Wrote a full **Pytest** suite covering API failures, bad input, and edge cases.

Study Group Finder / *Real-Time Matching Tool* / *Next.js, MongoDB, WebSocket*

 [GitHub](#)

- Built a **Next.js** app matching students into study groups by course and schedule.
- Used **WebSocket** connections for live group-chat updates without page refresh.
- Modeled flexible group/availability data in **MongoDB** with compound indexes.
- Ran a small pilot with 25 classmates and iterated on matching logic from real feedback.

EDUCATION

State University, Springfield

2022 – 2026

Bachelor of Science — Computer Science

CERTIFICATIONS

- JavaScript Algorithms and Data Structures — freeCodeCamp [Verify Certificate](#)
- Responsive Web Design — freeCodeCamp [Verify Certificate](#)
